JOURNAL

OF THE

AMERICAN SOCIETY

OF

SUGAR BEET TECHNOLOGISTS

EXECUTIVE COMMITTEE

President ..... Lloyd T. Jensen
The Great Western Sugar Company
Denver, Colorado

Vice President ..... Andrew R. Downie
Holly Sugar Corporation
Colorado Springs, Colorado

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... B. E. Easton
Canada & Dominion Sugar Company Limited, Chatham, Ontario, Canada

BOARD OF DIRECTORS

Pacific Coast Region:	M. Allan Woods
Intermountain Region:	Donald L. Oldemeyer
Eastern Rocky Mountain Region:	R. Ralph Wood
North Central and Great Lakes Region:	George J. Hogaboam
Canada:	J. Gerald Snow
Processing at Large:	William W. Barr
Agricultural at Large:	Ralph E. Finkner

Manuscripts submitted for publication and communications pertaining to editorial matters should be sent to James H. Fischer, Secretary-Treasurer, American Society of Sugar Beet Technologists, P. O. Box 558, Fort Collins, Colorado.

Each manuscript received for publication will be appraised for its technical and historical value by a Publications Committee. The Publications Committee shall have final authority regarding publication of manuscripts. The Journal of the American Society of Sugar Beet Technologists shall contain papers presented at General and Regional meetings and articles of immediate interest prepared specifically for this periodical.

Material submitted to the Publications Committee for publication becomes the property of the American Society of Sugar Beet Technologists. The Publications Committee will have jurisdiction over the release of papers and abstracts for use other than in the Journal.

AUTHOR INDEX

AlleHP
Alley, H. P. ;
Effects of four methods of mechanical incorporation on the phytotoxicity of pyrazon----------14(3) 248

AndeRN
Andersen, Robert N.
Herbicide mixtures for postemergence broad-leaved weed control in sugar beets----------14(4) 341

AndeFN
Anderson, F. N.
A survey of the nutrient status of soils in the North Platte Valley of Nebraska for sugar beet production----------14(1) 48

AyleJW
Aylesworth, J. W.
Effect of soil physical condition and fertility on yield of sugar beets on a Brookston clay soil----------14(8) 664

BakkFW
Bakker-Arkema, Fred W.
Refrigerated air cooling of sugar beets----------14(7) 547

BennCW
Bennett, C. W.
Effect of aphid-borne beet yellows and beet western yellows on sugar beet seed production under conditions of varying fertility----------14(2) 168
Competitive relationships in virus-infested sugar beet fields----------14(3) 218
Yellow wilt of sugar beet----------14(6) 480
Damage produced by beet yellows and beet western yellows under greenhouse and field conditions----------14(7) 619

BergeP
Bergen, Peter
Dry matter of the petiole as an index for the selection of sugar beet plants----------14(5) 396
Seasonal patterns of sucrose accumulation and weight increase in sugar beets----------14(6) 538

BickWG
Bickert, William G.
Refrigerated air cooling of sugar beets----------14(7) 547

BoltEF
Bolton, E. F.
Effect of soil physical condition and fertility on yield of sugar beets on a Brookston clay soil----------14(8) 664

BonnOV
Bonney, O. V.
Optimum application of wash water in automatic white fillmass centrifugals----------14(3) 181

BrubRW
Brubaker, R. W.
Effect of aphid-borne beet yellows and beet western yellows on sugar beet seed production under conditions of varying fertility----------14(2) 168

CalpoL
Calpouzos, L.
Control of Cercospora leaf spot by aerial and ground applications of fungicide----------14(2) 160
Evaluation of fungicides for the control of Cercospora leaf spot of sugar beets----------14(3) 232

CarlLW
Carlson, Lester W.
Fungicidal control of sugar beet leaf spot----------14(3) 254
Relation of weather factors to dispersal of conidia of *Cercospora beticola* (Sacc.)----------14(4) 319

CoeGE
Coe, Gerald E.
Selecting sugar beet seedlings for resistance to *Aphanomyces cochlioides*----------14(2) 164
Breeding for combined resistance of leaf spot and curly top in sugar beet----------14(6) 518

DaniRE
Danielson, R. E.
The effect of alfalfa in a rotation on yield and quality of sugar beets----------14(5) 405

DextST
Dexter, S. T.
The effect of low, medium and high nitrogen fertilizer rates on the storage of sugar beet roots at high and low temperatures----------14(2) 147
A rapid method of sorting sugar beets for storage----------14(4) 350
A rapid and practical method of determining extractable white sugar as may be applied to the evaluation of agronomic practices and grower deliveries in the sugar beet industry----------14(5) 433
Refrigerated air cooling of sugar beets----------14(7) 547

DoxtCW
Doxtator, C. W.
Correlation coefficient studies of testers and parents for combining ability in sugar beets----------14(3) 238
Performance of diploid and triploid sugar beet hybrids from the same genetic source----------14(7) 578

EastBE
Easton, B. E.
Presidential address----------14(1) 1

EhrenR
Ehrenfeld K., R.
Yellow wilt of sugar beet----------14(6) 480

EisFG
Eis, F. G.
A comparative study of the true sucrose content of Steffen and straight house molasses by isotope dilution----------14(3) 190
Investigations of the sieve analysis method----------14(4) 283

EvesD
Eves, Dean
Results of chemical weed control on sugar beets in areas of the Utah-Idaho Sugar Company----------14(4) 324

FaruDE
Farus, D. E.
Evaluation of fungicides for the control of Cercospora leaf spot of sugar beets----------14(3) 232
Herbicide mixtures for postemergence broad-leaved weed control in sugar beets----------14(4) 341
Effects of Cercospora leaf spot and dates of harvest on sugar beet varieties with or without Maneb treatment----------14(8) 643

FedeWT
Federer, W. T.
Relationships of four yield characters with five chemical characters in sugar beets----------14(7) 555

FergAC
Ferguson, A. C.
Effect of growth regulators on yield and quality of sugar beets----------14(1) 67
Gibberellin and maleic hydrazide as growth regulators in sugar beets----------14(7) 574

FifeJM
Fife, J. M.
A simple method for the determination of the relative concentration of total amino acids in juice expressed from sugar beet plant tissues----------14(2) 133
Changes in concentration of three amino acids, in mature leaves of sugar beet plants, produced by mass selection from a population infected with beet yellows----------14(4) 334

FinkRE
Finkner, R. E.
Evaluation of fungicides for the control of Cercospora leaf spot of sugar beets----------14(3) 232
Correlation coefficient studies of testers and parents for combining ability in sugar beets----------14(3) 238
Observations and correlations on the detrimental effects of savoy and yellow vein viruses on sugar beets----------14(4) 278
Divergent selection in tetraploid pollinators for high and low germinating triploid hybrid seed----------14(5) 363
Performance of diploid and triploid sugar beet hybrids from the same genetic source----------14(7) 578
Effects of Cercospora leaf spot and dates of harvest on sugar beet varieties with or without Maneb treatment----------14(8) 643

FrakMG
Frakes, M. G.
The effect of low, medium and high nitrogen fertilizer rates on the storage of sugar beet roots at high and low temperatures----------14(2) 147
A rapid method of sorting sugar beets for storage----------14(4) 350
A rapid and practical method of determining extractable white sugar as may be applied to the evaluation of agronomic practices and grower deliveries in the sugar beet industry----------14(5) 433

GarrRE
Garrett, Roger E.
Development of a synchronous thinner----------14(3) 206

GaskJO
Gaskill, John O.
Breeding for combined resistance of leaf spot and curly top in sugar beet----------14(6) 518

GoodAE
Goodban, A. E.
Sugar beet and purified juice quality in relation to nonsugar constituents----------14(2) 91
Preparation of galactinol and myoinositol from sugar beet sirup by chromatography on a cation exchange resin----------14(2) 127

GoodJC
Goodwin, J. C.
Sugar transformations in stored sugar beets----------14(3) 197

GoodJR
Goodin, J. R.
High temperature studies of sugar beet germination----------14(1) 61

HaldHE
Halden, H. E.
A simplification of the method for obtaining mean aperture and coefficient of variation of granulated sugars----------14(4) 297

HallRE
Hallbeck, R. E.
Optimum application of wash water in automatic white fillmass centrifugals----------14(3) 181

HammBL
Hammond, Bayard L.
Homozygous diploid sugar beets----------14(1) 75

HarrWA
Harris, W. A.
Treatment of evaporator thick juice with Pittsburgh activated carbon----------14(4) 271
Rapid determination of some nonsucrose components of beet juices----------14(6) 511
The TTZ (triphenyltetrazolium chloride) reaction for invert sugars----------14(7) 593

HarrEM
Harrison, E. M.
Sampling for 3-hydroxytyramine and polyphenoloxidase in sugar beets----------14(6) 470
Association of chemical characters with Cercospora leaf spot resistance in sugar beets----------14(7) 605
The interrelation of 3-hydroxytyramine and polyphenoloxidase with weight per root and percent sucrose in sugar beets----------14(8) 709

HeckRJ
Hecker, Richard J.
Effect of virus yellows on guard cell chloroplasts in sugar beets----------14(4) 292
Evaluation of three sugar beet breeding methods----------14(4) 309
Performance of sugar beet hybrids at different harvest dates----------14(6) 455
Sampling for 3-hydroxytyramine and polyphenoloxidase in sugar beets----------14(6) 470
Relationships of four yield characters with five chemical characters in sugar beets----------14(7) 555
Association of chemical characters with Cercospora leaf spot resistance in sugar beets-- ----------14(7) 605
Computer method for calculating percentage apparent purity of sugar beet thin juice----------14(8) 674
Attempted graft transmission of cytoplasmic male sterility in sugar beets (*Beta vulgaris* L.)----------14(8) 695
The interrelation of 3-hydroxytyramine and polyphenoloxidase with weight per root and percent sucrose in sugar beets----------14(8) 709

HillFJ
Hills, F. J.
Aphid control and planting date for the control of yellows of sugar beet----------14(2) 117
Yellow wilt of sugar beet----------14(6) 480

HillOA
Hills, Orin A.
Effect of aphid-borne beet yellows and beet western yellows on sugar beet seed production under conditions of varying fertility----------14(2) 168

HoovRM
Hoover, R. M.
High temperature studies of sugar beet germination----------14(1) 61

JafrAM
Jafri, Ali M.
Greenhouse testing of sugar beet for resistance to curly top----------14(8) 727

JameDW
James, D. W.
Potassium fertilization of sugar beets in central Washington----------14(8) 682

JeweHK
Jewell, H. K.
Effect of aphid-borne beet yellows and beet western yellows on sugar beet seed production under conditions of varying fertility----------14(2) 168

JohnHG
Johnson, H. G.
Control of Cercospora leaf spot by aerial and ground applications of fungicide----------14(2) 160

JohnRC
Johnson, Ronald C.
Results of chemical weed control on sugar beets in areas of the Utah-Idaho Sugar Company----------14(4) 324
Controlling soil crusting in sugar beet fields by applying concentrated sulfuric acid----------14(7) 615
Results of applying herbicides at time of last cultivation----------14(7) 637

KellJD
Kelley, James D.
Distribution of nitrate nitrogen in the blades and petioles of sugar beets grown at deficient and sufficient levels of nitrogen----------14(2) 106

KellyN
Kelly, Neil
Sugar and the synthetics----------14(1) 19

KerrED
Kerr, Eric D.
The effect of six different soil temperatures on infection and development of *Nacobbus batatiformis* in sugar beets----------14(2) 174

KidmDC
Kidman, Don C.
Results of chemical weed control on sugar beets in areas of the Utah-Idaho Sugar Company----------14(4) 324
Potassium fertilization of sugar beets in central Washington----------14(8) 682

KleinC
Klein K., C.
Yellow wilt of sugar beet----------14(6) 480

LangWH
Lange, W. H.
Aphid control and planting date for the control of yellows of sugar beet----------14(2) 117

LawJB
Law, Jay B.
Results of chemical weed control on sugar beets in areas of the Utah-Idaho Sugar Company----------14(4) 324
Controlling soil crusting in sugar beet fields by applying concentrated sulfuric acid----------14(7) 615
Results of applying herbicides at time of last cultivation----------14(7) 637

LeeGA
Lee, G. A.
Effects of four methods of mechanical incorporation on the phytotoxicity of pyrazon----------14(3) 248

LoomRS
Loomis, R. S.
Aphid control and planting date for the control of yellows of sugar beet----------14(2) 117
Competitive relationships in virus-infested sugar beet fields----------14(3) 218

McCrRM
McCready, R. M.
Sugar beet and purified juice quality in relation to nonsugar constituents----------14(2) 91
Preparation of galactinol and myoinositol from sugar beet sirup by chromatography on a cation exchange resin----------14(2) 127
Some substances adsorbed on granular carbon from beet thick juice----------14(2) 142
Sugar transformations in stored sugar beets----------14(3) 197
Polysaccharides of sugar beet pulp, a review of their chemistry----------14(3) 260

McFaJS
McFarlane, J. S.
Damage produced by beet yellows and beet western yellows under greenhouse and field conditions----------14(7) 619

McGiRA
McGinnis, R. A.
A comparative study of the true sucrose content of Steffen and straight house molasses by isotope dilution----------14(3) 190

MaagGW
Maag, G. W.
Sampling for 3-hydroxytyramine and polyphenoloxidase in sugar beets----------14(6) 470
Association of chemical characters with Cercospora leaf spot resistance in sugar beets----------14(7) 605
The interrelation of 3-hydroxytyramine and polyphenoloxidase with weight per root and percent sucrose in sugar beets----------14(8) 709

MillGA
Milliken, George A.
Computer method for calculating percentage apparent purity of sugar beet thin juice----------14(8) 674

MurpAM
Murphy, Albert M.
Breeding for combined resistance of leaf spot and curly top in sugar beet----------14(6) 518
Greenhouse testing of sugar beet for resistance to curly top----------14(8) 727

NaylRL
Naylor, R. L.
Treatment of evaporator thick juice with Pittsburgh activated carbon----------14(4) 271
Rapid determination of some nonsucrose components of beet juices----------14(6) 511

NelsRL
Nelson, R. L.
Rapid determination of some nonsucrose components of beet juices----------14(6) 511

NemazJ
Nemazi, Joseph
Effect of beet western yellows virus on sugar beets in Utah and Washington----------14(4) 357
Selection for the type O character in *Beta vulgaris*----------14(5) 368
Occurrence of double ovules in sugar beets----------14(5) 389

NichoG
Nichol, Grant
The effect of low, medium and high nitrogen fertilizer rates on the storage of sugar beet roots at high and low temperatures----------14(2) 147

NielsK
Nielson, Kent
Effect of beet western yellows virus on sugar beets in Utah and Washington----------14(4) 357
Selection for the type O character in *Beta vulgaris*----------14(5) 368
Occurrence of double ovules in sugar beets----------14(5) 389

OldeRK
Oldemeyer, R. K.
Mass selection for improvement of Cercospora resistance and sugar content in the Northern Ohio Sugar Company areas----------14(6) 465

OlsoRA
Olson, R. A.
A survey of the nutrient status of soils in the North Platte Valley of Nebraska for sugar beet production----------14(1) 48

OrleLP
Orleans, L. P.
Treatment of evaporator thick juice with Pittsburgh activated carbon----------14(4) 271

OttlEH
Ottley, E. H.
Attempted graft transmission of cytoplasmic male sterility in sugar beets (*Beta vulgaris* L.)----------14(8) 695

PaxsTE
Paxson, T. E.
Treatment of evaporator thick juice with Pittsburgh activated carbon----------14(4) 271

PaynMG
Payne, M. G.
Performance of sugar beet hybrids at different harvest dates----------14(6) 455
Sampling for 3-hydroxytyramine and polyphenoloxidase in sugar beets----------14(6) 470
Relationships of four yield characters with five chemical characters in sugar beets----------14(7) 555
Association of chemical characters with Cercospora leaf spot resistance in sugar beets----------14(7) 605
The interrelation of 3-hydroxytyramine and polyphenoloxidase with weight per root and percent sucrose in sugar beets----------14(8) 709
